chain pickerel

Dolliff Pond is a small spring-fed pond lying north of Route 3 near the Searsmont-Morrill town line. The pond is accessible via a field road with permission from the landowner.

Largemouth bass were recently introduced by the Department to add variety to this fishery. Chain pickerel are also present and are sought by both winter and summer anglers.

Anglers are urged to assist the Department in evaluating the recent bass introduction by reporting their catches to the regional fishery biologist or local Game Warden. Reports should be submitted to: Regional Headquarters, RFD #1, Box 6378, Waterville, ME, 04901 (phone - 547-4161).

Surveyed - 1970
(Revised - 1992) Maine Department of Inland Fisheries and Wildlife. Funded in part by Federal Aid in Fish Restoration Act under Federal Project F-28-P.
